Blake Gains In Recount

Democratic candidates were winners before the Supreme Court today. This morning Joe Egan's right to call himself Mayor of Honolulu was established, and this afternoon by a recount of the votes in Lihue precinct, Chas. Blake, defeated candidate for auditor of Kauai, according to the official returns, was put one vote in the lead of George E. H. Baker.

The official returns from Lihue precinct gave Baker 104 votes to 88 for Blake. The latter, in his own name, contested the election, alleging fraud or wrongful counting of the votes in this precinct. According to the count in the Supreme Court this afternoon, which was allowed in the Lihue precinct to discover if there was any truth in the allegations in the petition, Blake gets 69 votes while Baker is reduced to 100, which makes a net gain for Blake of five votes.

This puts him one in the lead for Auditor of Kauai, though it is probable that a recount of the votes in all the precincts will yet be had.

SURE THAT CONGRESS WILL HELP SHIPPING

Morgan Did Much Work For Hawaii On Coast

Jas. F. Morgan, the president of the Chamber of Commerce, returned last night in the Hilonian from the Coast, where he went mainly for the benefit of his health, but where he at the same time did a large amount of work in the interest of Hawaii.

"I attended the Trans-Mississippi Commercial Congress, meetings of the Board of Trade, and the convention held under the auspices of that body for the purpose of getting together material and statistics regarding tariff matters for submission to the Ways and Means Committee of the House.

"With regard to the coastwise shipping-law matter, I heard while I was in San Francisco that Captain Matson is delaying his plans for the construction of a new passenger steamer, and that he might build a freighter instead if the coastwise law were suspended.

"At the Trans-Mississippi Congress I had talks with various delegates and Congressmen, and I feel assured that some relief will be given American shipping, whether it be by subsidy or mail contracts or some such thing. This is the right time, and I have no doubt that some such measure will be passed."

During his stay on the Coast, Morgan also did much towards working up interest in the Pearl Harbor celebration in 1912, and in excursions from Seattle, San Francisco, and San Pedro. It is practically certain that the steamer Governor will come in February, picking up the Seattle men in San Francisco and touching San Pedro on the way. She will go first to Hilo, staying there three days to give the visitors a chance to see the volcano, and will then stay in Honolulu about a week.

The Buick Model F

\$1350.—DELIVERED IN HONOLULU, COMPLETE WITH TOP, GAS LAMPS, GENERATOR, ETC.

THE OLD RELIABLE MODEL F

This two-cylinder touring car has had five years of unparalleled success, and its unsurpassed ability for doing all-round work cannot be questioned. Strong statements, but any Buick owner will confirm them.

BRAKES
The service brake consists of external contracting bands on the differential drums and is operated by a foot lever. Internal expanding hub brakes acting on 14-inch wheel drums and operated by a side lever make an unusually strong set of emergency brakes.

MOTOR
The horizontal, two-cylinder opposed motor under the body is very accessible. The Buick valve in the head construction is used, the valve and cage being easily removed as a unit.

LUBRICATING SYSTEM
A mechanical force feed gear driven oiler is used. After the adjustments on the oiler have once been correctly made, no further attention need be paid to the lubricating system except to fill the oiler.

Model F Specifications

BODY—Side entrance tonneau.

SEATS—Five persons.

WHEEL BASE—92 inches.

GAUGE—56 inches.

TIRES—30 x 4 inch Michelin.

STEERING—Tilting column, pinion and sector.

BRAKES—External contracting on differential, and internal expanding hub.

SPRINGS—Three-fourths elliptic in front, full elliptic in rear.

FRAME—Angle iron.

MOTOR—Double opposed, 22 H. P.

CYLINDERS—4 1/2 x 5 inches.

VALVE ARRANGEMENT—In head of cylinder; cage and valve removable.

COOLING—Water. Gear pump.

IGNITION—Jump spark.

THE OLD RELIABLE MODEL F

ENGINE BEARINGS

The engine bearings are large and it is not necessary to readjust them every few weeks.

CLUTCH

The clutch is self-adjusting and is another mechanical appliance to which no attention need be paid excepting that it should occasionally be cleaned with gasoline and should be dressed with a few drops of castor oil to soften the leather.

CHANGE GEAR

The change gear is of the planetary type and is built remarkably strong. Proper lubrication is the only demand which this mechanism makes.

SPRINGS

Three-quarter elliptic springs in the front and full elliptic springs in the rear make the car "ride like a cradle."

IGNITION

A storage battery supplies the current. A reserve set of dry cells is a part of the equipment.

A CARLOAD OF THESE WELL-KNOWN AUTOS IS DUE IN THE "HILONIAN" TUESDAY.
